Peckham  
London . SE15 3RA

## Dear Harriet Harman,

Let me introduce myself- my name is **Sarah Campbell** and I am in year 6 at my school **St Mary Magdalene**. We are both happy and pleased that you are our local MP and we have drawn a conclusion to confronting you personally about humans horrifying idea plastic. Plastic is found everywhere in Peckham and we have to do something about it.

As you probably know, nearly all things are packed in plastic. One of our causes is plastic bottles. Many people enjoy a nice sunny day in the park beside the sea or a river. Unfortunately, people who can't find a dustbin nearby simply 'chuck' plastic into the ocean, river or stream. This also affects our sea life the animal that gets stuck in plastic is a turtle. Turtles mistake plastic bags for their pray jellyfish and suffocate. Especially children marine animals when they grow older the plastic around their face or body which can slow down the process of the animal growing. If you need a better reason plastic can cause cancer.

I and my comrades have come up with some ideas.

1. We can place more recycle bins to make the chance lower for any rubbish to fall into the ocean.
2. Instead of plastic buckets we can use metal buckets
3. We can put fruit into paper bags instead of wasting plastic that holds only 3 pears.

Those are just some of the ideas we have please write back.

Kind regards

**SARAH**
